Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The present invention relates to data processing apparatuses. More particularly, the present invention relates to data processing apparatuses that displays characters and images on a display device such as liquid crystal display.

The prior art of record in combination or alone fails to teach or suggest these elements of independent claims 1 and 6 in combination with other elements. For example independent claim 1 has claim limitations such as display device for displaying characters and images, a display driver device that controls display of characters and images on the display device based on commands, a data processing section that transmits instructions to the display driver device, and a command circuit that receives and analyzes commands to control of data to one of the display driver device or the data processing section, the command circuit being responsive to one of the commands to change the flow of data from flowing to one of display driver or data processing section to flowing to the other of the display device driver or data processing section.

Independent claim 6 is method claim for implementing elements recited in independent claim 1. For the above reasons independent claims 1, 6 and their dependent claims 2-5, 7-10 are allowable.

2. Claims 1-10 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
